In a tumult of fun, garni deft touches of buffoonery, and with dashes of ludicrous pantomime, a quintet of Metropolitan Opera stars romped through the bubbling "Barber of Seville" Tuesday night in the second opera of this year's season and gave to Atlanta one of the most exquisite presentations of any kind ever enjoyed here. The glorious Galli-Curci, the unimpeachable coloratura queen, eclipsed in many respects her marvelous work of last season in "La Traviate," and with the aid of Armand Tokatyan, tenor; Giusep pe De Luca, baritone; Ezia Pinza and Pompilio Malatesta, she added another delightful creation to this year's quota of grand opera de luxe.

Comedy ran riot in "The Barber' Comedy ran riot in "The Barber" and the stars played and sang the Rossini composition in a spirit of high hilarity and apparently enjoyed working as much as the big audience enjoyed their efforts. The "Barber of Seville," as offered Tuesday night, proved to be a complete refutation of assertions that grand opera is something not to be really enjoyed but to be absorbed for true culture's sake. It is safe to say that there has been nothing presented on any stage in nothing presented on any stage in Atlanta in many months that pro-duced as much genuine entertainment, and it is certain that few stage or musical attractions have been greet-ed with so many outbursts of spon-Tuesday night should be scored

In the first place, it will be the last opportunity many veterans will have to see the Stone Mountain memorial. There is a strong possibility, also, that plans for the Peachtree Creek Battleground park will be sufficiently advanced so that the veterans may help dedicate this great project during their visit.

Of particular importance to the city at large is the fact that the reunion will no doubt bring many thousands of visitors to the city, making it one of the most colorful gatherings ever staged in Atlanta.

Assisting Mr. Hallman in his efforts to increase the membership are the following officers of the chapter: Wade H. Davis, John T. Hancock, John Ashley Jones, Martine L. Harmsen, McWhorter Milner, Thomas H. Scott, Dr. H. R. Donaldson, Waddy Thompson, H. M. Turner and Bishop Henry J. Mikell.

The Confederate veteran reunion meets on May 8 to 11 in Little Rock, so that very little time remains in which to secure the required membership and to complete the final plans for Atlanta's fight, for the next reunion.

Senator Edwards, democrat, New Jersey, challenged Heflin to prove the statement, read into the record recently by the Alabaman "in whole or in part," after he had described the story about Hague as "untrue from beginning to end."

Answering the challenge, Heflin merely commented that he had not made the charge about Hague but had just read a story from a Trenton, N. J., newspaper. He said he accepted the statement of Senator Edwards that he was paying his own expenses but added that he did not think Edwards could speak for the other delegates.

Heflin then launched into a tirade against Smith's candidacy, declaring the New York governor's managers were conducting the "most secret and corrupt campaign, from the staddpoint of the use of money in the history of the party." He called for an investigation.

# Frigidaire is low in price

Frigidaire offers the outstanding values today in automatic refrigerators. With all the advantages it offers in mechanical construction, in dependability, in surplus power, in proven performance, the price is surprisingly low. The tremendous production and the buying power of General Motors have made Frigidaire prices possible.

> The combination of many factors have made Frigidaire the choice of more buyers than all other electric refrigerators combined

# Frigidaire is quiet

Constant improvement and refinement have made the new Frigidaire unbelievably quiet. A few feet away the hushed purr of its efficient motor is almost inaudible. Not only that, but it stays quiet, even after long service. In achieving quiet operation Frigidaire engineers have not lessened the power nor resorted to methods which would reduce the dependability or accessibility of any mechanical parts.

# Frigidaire is the powerful automatic refrigerator

Every Frigidaire, of whatever size, is equipped with a cooling unit powerful enough, sturdy enough, and big enough to keep food cold and freeze ice quickly, at all times, and under all conditions. This means dependability, especially when outside temperatures are excessively high and you need refrigeration most.

# Frigidaire is economical in the use of current

Low operating cost is a source of constant satisfaction to Frigidaire users. This is one factor of tremendous interest to stores, factories and other large users of automatic refrigeration. Frigidaire is flexible in design. The compressor and cooling coil are separate units. This means that the compressor can be placed wherever most convenient to the user, and where it will give greatest efficiency. In the Frigidaire line there are 12 types and sizes of compressors. There are 49 sizes of cooling coils. There are 22 models of household cabinets, 10 sizes and types of ice cream cabinets and 6 sizes of water coolers. Electric motors in 119 different powers, voltages and frequencies are supplied. The Frigidaire line is complete in order that every user may have equipment that will fit his requirements most economically and efficiently.

# Frigidaire household cabinets are artistically beautiful

Frigidaire's mechanical superiority is matched by the design of its cabinets. Beauty of line, proportion, finish and coloring combine to make Frigidaires strikingly beautiful. The fact that in household models all mechanical parts are completely enclosed, that the smooth, gleaming exterior surface is as easily cleaned as a china plate, that there is nothing to catch dust, grease or dirt, is thoroughly appreciated by any woman. Frigidaire's beauty and clean appearance is one of the great factors in making it the choice of home owners. Today Frigidaire is offered in Tu-Tone porcelain-enameled models, fitted with beautifully etched, satin finish hardware of new design. Other models are offered in Duco. All fit perfectly into the decorative scheme of

# Frigidaire food shelves are at a convenient, comfortable height

Frigidaire household cabinets are not only beautiful, but practical. The arrangement of food shelves is practical—even the lowest shelf is sufficiently elevated from the floor to eliminate the necessity of extreme stooping. Frigidaire is designed to make housework easier and less fatiguing—a point that should be seriously considered in the purchase of an automatic refrigerator.

# Frigidaire is a Product of General Motors

The absolute satisfaction of Frigidaire users is guaranteed by General Motors, the world's largest manufacturer of fine mechanical products. And the fact that Frigidaire has a sales, installation and service organization of more than twelve thousand men, that it has already achieved a success that insures permanence, makes your investment in a Frigidaire automatic refrigerator safe.

# Come High.

His Grace the Bishop of Sodor and nan who has just died was once scheduled to preach at a division rest camp behind the lines in France. Somehow the announcement of the sermon got into the wrong hands and nental bulletin boards had it that the Bishop of Sodom and Gomorrah would conduct the services. The announcement drew an immense conand excuse-hunters turned up that Sunday. The bishop preached from the text: "Our Lord is a suield and a buckler. A thousand shall fall on thy right and ten thousand on thy left, but it shall not come with The text was chosen, I presume, because the division was under orders to move into the line Monday morning and take part in some par-ticularly nasty attack across an open stretch of country. His Grace dwelled upon the horrors of battle, the glow pride that our parents and relawe were engaged in such a noble erprise as exterminating Germans or words to that effect and each time-as a gort of refrain he repeated the words of his text: "A thousand on right and ten thousand on thy but it shall not come nigh unto thy right and ten thousand on the yeft, but it shall not come nigh unto thee," that is to say "the death that stalks like a pestilence" mentioned in the same Bible quotation. It might as well be told now that we never got such a drubbing from the Germans as we did on the following day. as we did on the following day.

### When Bells Are Silent.

It's only on a day like Maundy Thursday, the only day in the year when the church bells do not ring in European countries, that one misses the familiar chimes and silver strokes. When the bells ring their monotoninsistent clamor at funerals, a presence has been removed from the sanctuary tends to increase the gloom. When I stepped into the sombr Notre Dame on that day, a hidden the transcept and the naves of the public spirited services in many ways, and the citizens of DeKalb name under the spell of the awful Latin invocation. Bach's "Stabat Mater Dolorosa." sung by an im mensely poignant voice suddenly filled the edifice. People were over come with emotion and sobs burst out here and there in the congrega-tion. One felt as if an unseen terror passed over. It was noticeably also when the crowd streamed out. Peohad run from Saint Julien-le-Pauvre to Trinite and Madeleine. I often asked myself in view of the masses of devoted worshippers in the churches, how it has been possible that the anti-clerical elements in France have ever been able to enforce their political program.

Age demands the respect of youth, but seldom earns it. Parents and instructors, in their dealings with youth, are blind and stupid. They say to the boy of 14: "You must have a quick and logical mind, capable of comprehending difficult problems in mathematics; you must know languages, history and literature; you must understand ethics; you must be governed by the rules of behavior established by adults; you must feel and act as gentlemen do; but you must not love as adults do, for that would be silly at your age."

At 14, or 15, or 16, the normal wholesome boy falls in love—usually with a woman older than himself. It is story-book love—clean, unselfish, worshipful, wholly sincere. There is nothing finer in this imperfect world.

The boy of 14 is a knight. His heart is clean and his thoughts are He dreams of conquering the world—bravely and honorably. His standards are high. He is the soul of chivalry. He scorns all that is unclean and unmanly. He dreams of perfection. If his love seems amusing to an adult world, it is because all of his illusions seem amusing. The adult world has compromised with honor, has surrendered its ideal to expediency, has soiled itself for profit, and

it sneers at "calf love" for the same reason that a prostitute sneers at "goody-goody" girls. When a man has lost his honor, there are but two courses open to him. He must face the facts squarely and in decent shame end his life, or he must quiet his conscience and regain his self-respect by persuading

himself to believe that honor is a sign of weakness and stupidity. It is an instinct for self-defense that makes the cynic sneer at righteousness; the vile sneer at the holy; the unclean sneer at the clean.

No Seed To Replant.

Reports received at Montgomery.

Ala., indicated that virtually all cotton and corn crops in southern Ala-bama have been so greatly damaged that replanting will be necessary. The same conditions have been reported from vast areas of the fertile lowlands of middle and southern Georgia. The situation has been made more

acute by a scarcity of seed, farmers have reported. In many instances the floods destroyed fields that already had been replanted because of frosts and freezing weather after the first crop appeared above the ground. Southern Georgia, an area of great diversification in agriculture, was heavy hit, because many of the money crops, such as watermelons, canta loupes and truck were well out of the ground. Other crops, newly planted and some planted for some time but not yet up, probably will be lost due to the terrific washing of the soil and wetness which causes seed to rot in the ground rather than germinate.

No Way To Estimate. Eugene Talmadge, Georgia sioner of agriculture, issued a statement in which he stated that the spring had proved the worst for the Georgia cotton planter in 18 years of

his experiences.
C. F. von Herrmann, United'

# No other tooth paste produces this lasting feeling of coolness in the mouth

Large tube 25¢

HERE is a dentifrice that swiftly polishes teeth till they gleam, and then leaves the mouth with an amazing feeling of cleanliness and invigoration. Furthermore, that sensation lingers. It delights millions.

And no other dentifrice produces it. Because no other dentifrice contains the essential oils of Listerine.

We are proud of Listerine Tooth Paste. Studying teeth and the mouth, for nearly fifty years, we learned much about their requirements for beauty and health. This dentifrice fulfills them. We believe it to be the

finest dentifrice manufactured today, regardless of price.

Try it for one week. Note how teeth gain new brilliancy. Observe how discolorations and tartar vanish. And after tooth brushing is over, look for that wonderfully cool and clean sensation in the mouth.

Then reflect that Listerine Tooth Paste costs but 25c-half of what you usually pay for a good dentifrice. Such a price for such a paste is made possible only by modern manufacturing methods and mass production. Lambert Pharmacal Co., St. Louis, Mo., U. S. A.

play Tuesday over the Druid Hills course.

With the exception of the 3-2 victory scored by Gottenstrater over Dr. H. B. Kennedy, all the first round encounters went by rather impressive margins. Hunter gained his place in the sun by defeating Glenn Allan 6-5; Bridges reached the heights by disposing of C. D. Guerry 6-4, while Fowler romped to a one-sided victory over R. E. Carter by the count of 7-5.

Trails Foe.

Gottenstrater, who shared the low qualifying honor Monday with Fowler, got off to a rather poor start, and at the end of three holes was trailing the medical man by just that number. Prohibition isn't a success. A fellow used to drive home from the ball game and get dizzy on a glass of beer.

Now he gets dizzy driving home,

It's Happened.

First of all, let it be chronicled, the Crackers-Atlanta's Crackershave won a ball game from the league-leading Bears and they did it by timely hitting and good pitching combined—a very rare combination in the Cracker makeup thus far in 1928.

That game Tuesday, played even unto the shades of night, is the bright light of a very shadowy season and there seems to be no reason for hiding the light under a bushel.

We went to the park Tuesday to try and discover just what made the Crackers lose a long string of games on the road. Along about the fourth inning we had the problem solved. Loose fielding was the answer. Then came the sixth and a wild heave scored another run for the Bears. That proved our belief and by that time we had added Cracker stick weakness in the pinches as another reason.

Everything went along smoothly with our idea until darkness began to settle in the eighth and the Crackers were having their last turn at the rubber-and they were trailing by three

Then things began to happen. Our dope was sadly and rudely smashed about our ears when the Crackers let loose with three singles, a triple and a hit batsman to win a ball game. The matter of sloppy fielding still stood unimpeached but one can't exactly say that a ball game is lost by bad fielding when the ball game is won.

At any rate the Crackers have won their second game of the season, Jim Poole has his third hit of the season, Atlanta has seen Atlanta play its third game of the season and almost everybody is happy. Everybody except those impatient fans who left the park at the end of the seventh and missed the fireworks. And we have no great sympathy for them.

Mobile may be leading the league but they are not the world's fastest clothes changers. Tuesday the Crackers and their visitors got in town on the same train at 3:30 and the Atlanta players had donned their road uniforms to be ready to play when they reached the park. Mobile had not changed. Both teams reached the park at 3:50 and the first Mobile player stepped on the field in uniform at exactly 4:30. Forty minutes to change from street clothes to uniforms. This may be prerogative of a league-leading club but it is rather hard on the fans who wait more than an hour to see them play. These same fans pay the price to see them play, not to wait while ball players emulate the sweet somebody in her nightly preparation for

# Double-Bill Slated Today At Spiller's

Crackers Rally and Scot Four Runs in Eighth Inning To Beat Bears.

BY BEN COTHRAN.

You are cordially invited by Color Rell J. Spiller and all those interested to join in the cheering and buzzas o casioned by a 5-to-4 victory for A lanta at the expense of the league leading Mobile Bears Tuesday after-noon at the Dell, Today there will be a double-header, beginning at 2:15 o'clock, Blethen will pitch the first game for Atlanta.

The game furnished several things to those looking on. It furnished the reason why Atlanta lost nine straight games. It furnished the wherewithal for Atlanta to break this same losing streak. And it furnished a story with

The moral is: Never try to hold up a ball game in the hope that darkness will overcome you while you are in the lead. For, as ably demonstrated yesterday, you are very likely to lose it.

Everything was an hour or more behind schedule yesterday. Monday the Crackers were held up by a washout near Castleberry, Ala. To get to Atlanta they were forced to go back to Mobile, thence out of the United States into Mississippi and Meridian, back by way of Selma and Montgomery to Atlanta on a special train. ery to Atlanta on a special train.

Arrival. At 3:30 o'cleck the Crackers the Bears arrived at the Termi station and ten minutes later 10,0 taxicabs came hurtling down Ponce Leon and brakes screeched in fro of the ball park. Out hopped to Crackers in road uniforms and o hopped the Bears in civilian clothe The Crackers went out for practic had to go in and change to the home uniforms, and took more pra-

ice. Finally the Bears straggled cand the game got under way at exa y 20 minutes before 5 o'clock. For the first three innings t game looked like a good one. M Pence was right-handing very effet tively for the Crackers and Red Ol ham was doing the same thing wi his left hand for Mobile. Then in the fourth Kinwick Rear third became fourth Kimmick, Bear third basems put himself in the way of one Pence's slants and went to first. Sha er followed this with a two-time r to left field. Then Dutch Wel knocked one to Billy Rhiel at seco and Billy let fly for home. The ball hadn't traveled far before you could see "two runs" written in letters a foot high all over it.

It was ten feet away from Johnny Brock and Kimmick and Shaner romped home, while Welch continued to record Al Nicheway received to

to second. Al Niehaus sacrificed to Welch at third, and he scored when Pence got a wild pitch out of his system. That left the Bears three up and

There was no cause for complaint from slowness now. Batters were coming up to the plate and going back to bench with regularity and alacthe bench with regularity and alac-rity. Two singles and a stolen base served to break the monotony in the sixth as Welch pounded the rubber to make it four runs for Mobile. Observers sat back and finade obser-vations. "The Crackers have lost

those games because of spotty field-ing and the hitting hasn't been so lovely, either."

That was at the end of the first

That was at the end of the first half of the sixth. In the Crackers half Billy Rhiel came to life and slammed a double to centerfield. Paul Strand, next up, hit to Narlesky at short, who booted the ball and Rhiel scored. West skied to right and Poole struck out. "Well, the Crackers won't be shut out, anyway."

Mobile was very orderly in the seventh, managing to get a man as far as second base. At the end of this inning in went Jay Adcock for the Crackers. Pence had allowed four

the Crackers, Pence had allowed four hits in his seven efforts. Adoock let the Bears down with no hits in the

Then the Crackers came to bat, and here is the moral of this story. Tom Rogers, went in to bat for Frankie Zoeller, and began the inning by being hit by Mr. Oldham. Dudley was put on the paths to run for Rogers. Walter Gilbert tripped up to the plate and drew a single to right field, Dudley nutting on the brakes at second. ley putting on the brakes at second. Billy Rhiel followed with a single to right and Dudley galloped home, making a beautiful slide in to the plate. Gilbert went to third and Rhiel to

Suddenly the Bears showed a pro Suddenly the Bears showed a propensity for conversation. The shades of night were falling and quickly. A group of players converged at third, diverged and reconverged at the plate and then the convention was transferred to the pitcher's box. Finally Guy Morton replaced Oldham for Mo-

Guy Morton replaced Oldham for Mobile.

Paul Strand, meantime, had been pacing around at the plate waiting for a chance to hit. He fouled one. Then another one. The score had been in imminent danger of being tied, but it looked as though the big Dutchman was going to fail in the pinch.

But he connected on the next one and sent it sailing to right field, Under ordinary conditions, it is possible that Welch, patrolling that particular section of the outfield, would have caught the ball. But it was dark, and the ball went over his head. Gilbert and Rhiel galloped home. The Dutch Cleanser had scoured the bases. There were none down, a man on base and the man was to be called at the end were none down, a man on base and the game was to be called at the end

the game was to be called at the end of the inning.

West and Poole were intentionally walked, filling the bases and giving Mobile a chance for a putout at every base, which sometimes is a good idea. At this point, however, entered Johnny Jones and the squeeze play. Johnny laid down a beautiful bunt to the box. Strand scored, the tie was broken and so was Atlanta's losing streak. Jones got credit for a single, Strand having been advanced a base. It's possible that Mobile won't hang around waiting for darkness many more times.

more times.

And it's also possible that Atlanta can begin kicking through with timely hitting when the pitching is good, as happened Tuesday. Mobile made four hits to nine for the Crackers.

Maybe the local crew will lose today's double-header or win it. But the losing streak has been broken.

# **Brick-Surfaced Pavements Keep** Open to Traffic

You seldom see "Closed to Traffic" signs on brick-paved roads or streets.

Why?

Laid on any good foundation, with a sand cushion, and bound with asphalt, a brick surface protects the pavement foundation from both traffic punishment and weather damage.

A vitrified brick surface is impervious to water; does not suffer injurious chemical changes. Resilient, it can

take without damage heavy blows from traffic or can contract and expand in changing temperatures without cracking up. A brick surface has never yet been worn out.

Hence less repairs; and no big maintenance bills. Necessary openings are quickly made, quickly closed again with the original bricks.

# BEAUTIFUL BELLES AND LOVELY MATRONS ATTEND GRAND OPERA ROSSINI'S "BARBER" OF SÉVILLE" SUNG BEFORE COLORFUL AUDIENCE

Departing from the more serious reign of tragedy to which the selections of grand opera generally runs, "The Barber of Seville" formed the vehicle expressing Rossini's lightness and melody presented by the Metropolitan company to its brilliant audience Tuesday evening.

Never before included in the Metropolitan's repertoire for its annual engagement here, this, the oldest of the nine operas to be presented this week, scored a triumph which assures it a place among Atlanta's favorites. Cast in the role of "Rosina," Amelita Galli-Curci, the gifted and delightful coloratura soprano who has ever been a favorite with Atlantans, left nothing to be desired in her presentation of the charming ward, which is one of the finest musical creations in her repertoire. Armand Tokatyan, the Armenian tenor, who possesses a large following of music lovers in the south, supported the prima donna in the role of "The Count of Almaviya." Pompilio Malatesta, as "Dr. Bartolo," sustained his reputation as the hated and suspicious physician who secretly hopes to marry his charming protege, "Rosina." Taking the clever role of "Figaro," the barber, was that delightful and inimitable actor, Giuseppe de Luca, whose superb baritone rose to the heights of its perfection when he

deli ered "Largo al factotum," considered the best basso buffo number ever written. As a contrast to the highly dra-

matic theme which dominates the other operas offered this season, this opera buffo proved entirely Others in the cast were Henriette Wakefield, as Berta;" Ezio Pinza, as "Don Basilio;" Vincenzo Reschiglian, as "Florello," and Giordano Paltrinieri as an official.

Galli-Curci's Favorite. A genius for writing fresh and vigorous melodies is one of Rossini's strongest characteristics, and in creating the famous character, "Rosina," he has given Galli-Curci one of her favorite parts. The brilliant aria, "Una voce poco fa," was one of the high lights of Tuesday evening's presentation, and another coloratura solo which won the instantaneous approval of her At-lanta audience was "Variations of Proch," afforded in the music lesson scene in the second act and selected by popular vote as the air to be interpolated by the artist. The caden-zas, with flute accompaniment, displayed to magnificent advantage the range of the prima donna's voice and she followed this number with the ever popular and ever appealing "Home, Sweet Home," its rendition

receiving an ovation.

The simplicity of plot and its composition in two acts renders "Il Barbiere Di Siviglia" a masterpiece

of brightness and humor.

Brilliant Audience.

Tuesday evening's audience lacked nothing in brilliance and gayety. assembling social leaders and music lovers from all over the south. Magnificent costumes, offset by glittering jewels and rare exotic Howers, lent color to the vast gathering, the kaleidoscope of fashion passing in bewildering array during and second acts. The elaborately beaded and bejeweled evening gown of several seasons ago is passing into the limbo of styles that have seen their day, and taking its place is the picturesque robe de style of crisp taffetas or the filmy, billowy del of tulle and chiffon, lending unusual charm and Castilian splendor to the setting. Gay Spanish shawls, elaborately embroidered and finished with long graceful fringe, added a note of color and view in beauty with the sumptuous evening wraps which during the perform-ance draped the backs of the chairs in the brilliant horseshoe of boxes. A phalanx of exotic orchids adorned gleaming shoulders, mingling with the perfume of valley lilies, roses and sweet peas.

### "Hansel and Gretel," the delightful "Peter Pan" of grand opera, to be presented Wednesday afternoon at 2 o'clock at the city auditorium on a double bill with "Pagliacci," will supplant the customary dignity and solemnity of opera with a joyousness and fairy-like charm that shall assure its place in the hearts of youth and grown-ups as well. The delightful story built around "Babes in the Woods," which the composer, Engelbert Humperdinck, first used to amuse his sister's children, will afford an opportunity not only of seeing two captivating little German peasant children become

lost on their search for strawberries, find themselves after sleep in the

house of the witch and finally save themselves from her trickery, but of

Martin Amorous is still waiting to complete his testimony before the committee, but Senator Smith does not seem especially inclined to let the Georgia expert tell his story for the record. The views of Mr. Amorous are rather contrary to some held by the senator, and when the Georgian was briefly heard last week there were several brusque interchanges between him and the Carolinian.

Mr. Amorous goes to New York to visit his son there over the week-end but will return with the expectation of being heard by the committee next Monday.

LANCE KEEPS A SECRET.

Lance felt for the bread in his grandfather's pocket, and standing beside him and crumbling it became a part of the cloud of birds. His impressions were quick and vivid. The birds had no fear of him; they settled upon his wrists and should sween as they settled on his grandfather's window he saw beyond the reds and golds and purples of the Venerable's garden the shadows of the castle and the Lah trees stretching far across the green of the castle filed. It was half past five, and he had sixty miles to cover, and a secret to keep both at Windower and Castle Craven.

"I have fed them like this for seven years."

"Every day?"

"Winter and summer, but in winter, I feed them before dinner."

"Where do they come from?"

"Our pigeon lofts and the castle. The castle's full of the blue birds."

"I was going to look at the castle. Can I get to it down this yard?"

"Yes, sir, past my cottage and over the field."

Lance wanted to say to him, 'Don't call me 'sir.' It is I who ought to call you sir."

"Is that your cottage?"

"Yes, sir."

call me 'sir.' It is I who ought to call you sir."

"Is that your cottage?"

"Yes, sir."

"Looks out on the castle."

"Very peaceful. A place to read or write in."
"That's so," said his graudfather.
"I read a lot. Books stay with you." I read a lot. Books stay with you."
Lance, with a smiling softness of
the eyes, looked down at his grandtather. Butinwardly he was looking up to him. What a man of surprises! With that venerable head and thought ful face of his, full of the humility of service, yet resolute in his pride, with birds and books for his \*ciends.

"What books do you read, sir?"
The "sir" slipped out, and old Pybus' blue eyes gave a curious flicker.
This young wan was unusual, very

that he's dead.

And Hew-lett's dead! What a book—The Forest Lovers.

"Rest Harrow was bigger—"
"Bifferent. And what a figure—with his flowers and his shepherds and his Wiltshire downs!"
"Talking of figures—Hudson—mow." "Ah, Hudson," said Lance with a little thrill in his voice.

And then suddenly they looked at each other, and in that look there was a kindling of emotions, a queswas a kindling of emotions, a question, a wonder. Each had a feeling of subtle infection, of a drawing together, of some mysterious spiritual relationship. To Lance, the thing was becoming exquisitely real. For the old man the feeling had a disturbing, puzzling strangeness.

"Care to see my books?"

"I'd love to."

"The free from four till six. They treat me very well here. A had comes in to help."

"I'm glad of that," said Lance, His grandfather's blue eyes seemed to grow big and strange. Why did he say he was glad? And he was glad. You caught the vibrations of it—in his voice.

John Pybus had five shalves of books, but the first things that Lance books, but the first things that Lance books, but the first things that Lance happened to notice in that austere little room were the photos of his father and his uncle on the mantelpiece. They had been taken many years ago, but even from the doorway Lance had recognized the flabby pallor of Conrad's full moon face, and his father's oblique glances. But he paid no heed to them. He was all for continuing to be the unknown young man until he and his grandfather should have come closer to each other.

market reflected continued nervousness and price irregularity with Richmond following Boston, Chicago and St. Louis in advancing the rediscount rate, from 4 to 41-2 per cent. Call money renewed at 5 per cent against yesterday's renewal rate of 43-4. There was selling today of General Motors, Steel common and other leading stocks on all strong spots.

In looking backward it is now plain to many stock market observers that General Motors, the recognized leader of the stock market for the past two years, has been sold on all strong spots since the high for the year was made on April 13 at 1991-2. Steel common made its high in the recent unprecedented wild bull stock market on April 12 at 154 since when it has been sold on all strong spots. The average price of 50 representative stocks made the new high for all time on April 13 at 196.80. The 1928 low was 189.51, made on February 20 during the temporary decline in brokers' loans. C. Durant in the stock market have been "hooked." On sailing for Europe the end of last week Durant made a the end of list week Diffract hade avery optimistic stock market statement for the long look ahead. No date was mentioned, however, in his statement except one, 1932. He predicted that between now and then time money would be worth only 3 per cent and that General Motors would then becausing \$14\$ a state paying the investearning \$14 a share paying the inves-tor 5 per cent on a market price of 280. Durant had nothing to say re-280. Durant had nothing to say regarding the immediate future of the stock market beyond the strength recently displayed by the market in withstanding "repeated attacks of selections."

This Year's High.

This year's new high for all time of 196.80 made on April 13 compares to federal bank control of broker loans." control of broker loans.

If Wall street is correct in its theory that optimistic followers of Durant have been "hooked" in the stock market the feeling in conservative bank-ing circles here is that such holders of stocks have only themselves to blame. For the past mouth or more it was pointed out today in this connection, it has been perfectly plain that the undertone of the money market was growing firmer as a result of the stendily expanding brokers' loans and that in the meantime with a long string of 3,000,000 and 4,000,000-share

days it was possible to sell almost any amount of stock without breaking Last September when the stock market was boiling on easy money the late John J. Mitchell, of Chicago, expressed the belief that the antics of the stock market together with easy money was creating a widespread frame of mind where holders of speculative stocks were being led to expect more than they were likely to receive. An example of what Mr. Mitchell had in mind is found in General Railway Signal. That stock advanced from its

ample of what Mr. Mitchell had in mind is found in General Railway Signal. That stock advanced from its 1927 low of 82 to 103 1-4 last September. This year's high was 123 5-8 with the 1928 low recently touched at 86 1-4.

Quarter Earnings.

Today's statement of earnings for the first quarter of 1928 shows 48 cents a share for the stock against \$2.08 for the first three months of 1927.

Close stock market observers were of the opinion that there would have been more selling of stocks today in view of the existing rediscount rate situation but for the uncertainty of what might be shown in the first quarter e arnings statement of United States Steel and General Motors expected after the close of the market. It was generally hoped that these statistic three would be very favorable and hence would inspire confidence in the immediate future of the stock market. From information already available it was known that General Motors would make a new quarterly high record. It was also known that the operations of the steel corporation were bigh but the selling prices received were an unknown factor.

# \$50,000,000 **Cities Service Company**

5% Gold Debentures

Due April 1, 1958

Interest payable April 1 and October 1 at the agency of the Company in New York City, or, at the option of the holder, at the agency of the Company in Chicago or in Boston. Redeemable on any interest date on thirty days' published notice at 105 and accrued interest through April 1, 1938; and at various reductions in the redemption price thereafter. Coupon Debentures in \$1,000 denomination, registerable as to principal. The Equitable Trust Company of New York, Trustee.

> The Company will agree in the Indenture to make available semi-annually beginning April 1, 1929, funds sufficient to retire 14% of these Debentures at the time outstanding, if obtainable, during specified periods, by purchase at or below 100 and accrued interest.

TAX PROVISIONS: The Company will agree to pay interest without deduction for any Federal income tax not in excess of 2% per annum, and to refund Pennsylvania 4 mills tax, Maryland 4½ mills tax, Connecticut 4 mills tax, California 5 mills tax, and Massachusetts income tax not exceeding 6% per annum, upon application as provided in the Indenture.

For further information regarding the Company and these Debentures, attention is called to the letter of Mr. Henry L. Doherty, President of the Company, copies of which will be furnished on request and from which it will be noted, among other things, that:

Company: Cities Service Company controls, directly or indirectly through stock ownership, more than sixty public utility companies rendering electric light, power, gas and/or transportation service in seventeen states and the Dominion of Canada, serving territories having a population estimated to be about 4,000,000, and more than thirty companies representing an important system of oil production, transportation, refining and marketing. The public utility companies render service to over 650,000 customers in more than 700 communities. The oil subsidiaries have a present daily average production in excess of 60,000 barrels of crude oil. They own and operate seven refineries and about 900 miles of oil pipe lines. The more important petroleum properties are located in what is commonly called the Mid-Continent Field in Kansas, Oklahoma and Texas, and the natural gas business is conducted principally in Kansas, Oklahoma and Missouri.

Purpose of Issue: The entire proceeds derived from the sale of these Debentures will be used for the retirement of funded debt of the Company and for the retirement or acquisition of funded debt or preferred stocks of subsidiaries outstanding on December 31, 1927, thereby effecting a substantial saving in interest and dividend charges.

Earnings: The consolidated earnings of Cities Service Company and subsidiaries for the twelve months ended December 31, 1927, irrespective of the dates of acquisition, are given below:

Gross Earnings ..... \$158,028,257 Operating Expenses, Maintenance, Taxes (except Federal Income Taxes) and amounts applicable to minority common stocks.....

Consolidated Net Earnings before Interest, Depreciation, Depletion and Other Annual Interest and Dividends on funded debt and preferred stocks of

subsidiaries to be outstanding upon completion of this financing....\$20,530,976 Annual interest requirements on funded debt of Cities Service Company to be outstanding ...... 3,575,717 24,106,693

Net Earnings Before Reserves, as Above, Are Over 2.4 Times the Above Annual charges.

The dividends which the Company now receives from one of its subsidiaries, Cities Service Power & Light Company, alone are at the annual rate of over 1.4 times the annual interest charges on funded debt of Cities Service Company to be outstanding upon completion of this financing.

Capitalization: The consolidated capitalization of the Company and subsidiaries as of December 31, 1927, after giving effect to this financing, the application of the proceeds, the retirement and/or exchange of certain other funded debt and the recent offering of additional common stock of the Company, shows outstanding funded debt, preferred stocks and minority common stocks of subsidiaries amounting to \$352,406,179; \$2,320,000 Equipment Trust Certificates; and \$71,-514,356 funded debt of the Company which will be followed by preferred and common stocks with an aggregate market value based on current quotations of over \$375,000,000.

Assets: The consolidated balance sheet of the Company as of December 31, 1927, after giving effect to the financing mentioned above, shows total net current assets of over \$70,000,000 and total net assets, after deducting all proper liabilities other than funded debt of the Company, of over \$290,000,000 or more than 400% of such funded debt.

Indenture: The Indenture will provide, among other things, that the Company shall not pledge any of its securities owned without equally and ratably securing these Debentures, except in the case of purchase money liens and except in the case of pledge of certain assets in the ordinary course of business to secure current borrowings. The Indenture may be amended in certain respects with the consent of the holders of not less than 85% of the outstanding Debentures.

We Recommend These Debentures for Investment

Price 98 and Interest, Yielding 5.13%

These Debentures are offered for delivery when, as and if issued and received by us and subject to approval of counsel. It is expected that temporary Debentures will be available for delivery on or about May 15, 1928.

than due and first trades showed losses of from 7 to 9 points. Prospects of fair weather prevailing next month as revealed in the weather caused further recessions with May touching 19.67, July 19.56 and Octo-ber 19.32; 9 to 13 points below yes-terday's close and today's lows.

Market Turns Easier. As the session progressed, the marprivate reports were received if damage resulting to the crop over the week-end from rain and storms. There also were reports of considerable price fixing in the near month positions and purchases.

First Prices Lower.

First prices were 7 to 10 points lower and the active months showed the losses of about 10 to 12 points during the early trading, but the cferings were absorbed by trade buying.

First Prices Lower.

Known cotton authority had said that planters in the eastern and central sections of the belt were more behind with their crops than ever before. LIVINGSTON & CO.

New York, April 24.—The market gave another exhibition that was surprising to day. Around noon there was a slight rally on which trading turned dull, usually a sign that the rally will be followed by further selling. Today, however, the market clearly indicated that the public would not sell stocks and continuing dullness finally brought short covering into a number of issues with renewed huying in others.

Stocks were very strong toward the close. The leaders of the rally were the rails at first with New York central in hig demand and New York central in hig demand the proposed of the proposed o terest. It is difficult to see how the market can make a gerat deal of headway at present in the face of higher money and federal reserve pressure. At the same time there is every indication that the public cannot be forced to sell stocks. We look for a period of irregularity which should last several weeks but which finally will swing into another strong market later in May. At this time money rates should begin to ease to some extent.

# Republic of Estonia

(Banking and Currency Reform) 7% Loan, 1927

Issued under the auspices of the League of Nations

NOT CALLABLE BEFORE JULY 1, 1937, EXCEPT FOR SINKING FUND

Mr. Albert Janssen, Belgian member of the Financial Committee of the League, Trustee.

Dated July 1, 1927 Due July 1, 1967 Authorized and issued: \$4.000.000 7% Dollar Bonds. £700.000 7% Sterling Bonds. Interest payable semi-annually January 1 and July 1. Coupon Bonds in denominations of \$1.000 and \$500. Principal and interest payable in New York City at the office of Hallgarten & Co., Fiscal Agents of the Loan, in gold coin of the United States of America of the standard of weight and fineness existing on July 1. 1927, without deduction for any present or future Estonian taxes, stamp duties, impositions or charges whatsoever and payable in time of peace or war, whether holders be subjects of a friendly or hostile country.

Cumulative sinking fund, calculated to retire the entire issue by maturity, operating by purchases at or below par or by drawings at par. Redeemable in whole or in part on July 1, 1937, or on any interest payment date thereafter, at par upon six months' previous notice.

ESTONIA, located on the east shore of the Baltic Sea, has an area of about 18,350 square miles (greater than that of either Denmark, Holland or Belgium) and a population of over 1,100,000. Estonia has been an independent republic since 1918 and became a member of the League of Nations in 1921.

Estonia is essentially an agricultural country, about 68% of its population being engaged in such pursuits. It has well-established textile, paper, leather, glass and metal industries. Government-owned forests and oil shale beds are being extensively developed. Dairying is the chief agricultural enterprise, Estonian dairy products ranking in quality with

FINANCES: The internal debt of Estonia amounts to the equivalent of approximately \$1,367,292, and apart from the present Loan and the loan of £130,000 of 1926, the only external debts are those due to the British, United States and Swedish Governments, which were incurred in connection with supplies of goods by these Governments during the reconstruction period and have been funded at low rates of interest. These debts on January 1, 1928, amounted to the equivalent of about \$21,581,769, but have no specific security.

PURPOSE: In December, 1926, the Council of the League of Nations approved the raising of this Loan by Estonia to provide an effective net sum of £1,350,000, of which £1,000,000 has been transferred to the Bank of Estonia in exchange for long term assets and the balance is to be used for the establishment of a new Mortgage Institution.

SECURITY: Under a Protocol signed at Geneva by the Estonian Minister of Finance on December 10, 1926, and approved by the Council of the League of Nations, the Loan, together with a loan of £130,000 (now reduced to -approximately \$570,000) raised in England in 1926 under the Trade Facilities Act, has a first charge on the excise duties on: (a) tobacco; (b) beer; (c) matches and other minor articles.

In the fiscal year ended March 31, 1927, the assigned revenues yielded about \$1,300,000, while the service of this Loan and of the loan of £130,000 of 1926 requires about \$650,000 annually.

If, in any quarter of the financial year, the yield of the assigned revenues falls below 150% of the amount required for the service of this Loan, the Trustee may demand that additional revenues or assets be assigned.

New York, April 24 .- (A)-Prices Chicago, April 24 .- (P)-Reported abandonment of 90 per cent of 2,500,- advanced slightly in rather libtless 000 acres of winter wheat in north- trading on the curb market today. Inwestern Kansas did much to lift wheat crease of the call money revenue rate values today. Unfavorable crop ad- to 5 per cent and general unessiness vices from other parts of the United over the credit situation were offset

values today. Unfavorable crop advices from other parts of the United States winter wheat belt were also at hand, together with word of adverse conditions in a good deal of spring wheat territory.

Closing quotations on wheat were strong, 1 1-4c to 2c net higher, with corn unchanged to 3-4c up; oats showing 3-8c to 2c advance, and provisions varying from 2c decline to a rise of 22c.

At first the wheat market here was bearishly affected by predictions of showers in western Nebraska and elsewhere in the middle and northern plains states. Rallying power soon showed itself, however, and as the day progressed the market advanced vigorously.

Corn owed its strength largely to anouncement that lake vessel charters had been made to move 2,000,000 bushels of corn from Chicago and 500,000 bushels from more northern parts. Generous shipping sales of oats here tightened up that market.

Provisions moved up with hog values and with grain.

Selection of Atlanta for location of a large assembly plant of the Indiana Truck corporation, marking the first step in the company's expansion policy as an outgrowth of the merger with the Brockway Motor Truc': corporation, was disclosed as the result of a preliminary survey of the southeast by Martin A. O'Mara, president of the two companies, and J. W. Stephenson, chairman of the board of the Indiana Truck concern.

Plans for Atlanta's latest industrial expansion were revealed Tuestand

Plans for Atlanta's latest industrial expansion were reveal a Tuesday night in an interview with the two prominent motor car executives. The proposed plant would have a minimum output of 1,000 Indiana trucks during the first year it is established here and would require the erection of a plant employing from rection of a plant employing from 50 to 200 employees at the outset, Ir. O'Mara stated, emphasizing the point that the plans were tentative, requiring further investigation of the field by experts before an executive mittee would take formal action.

Three Plants Planned. merger of the two truck manuacturing companies has resulted in a sombination that is the third largest in its field and the largest in exportation of trucks, the executives tated. A feature of the merger is o make it possible to cover this country intensively at the same time adapting the production of the combined or application to the various sections of ganization to the various sections of the country. It is in this connection that the concern plans the erection of three major assembly plants. The of three major assembly plants. The first of these is the one expected to be located here.

The Brockway Motor Truck corration has its manufacturing plant Cortlandt, N. Y., and confines its stribution and merchandising of commercial motor vehicles to the east. ne large manufacturing plant of the diana Truck corporation is located at Marion, Ind., and will cover the middle west, southeast and southwest. Three additional plants are planned Three additional plants are planned to fulfill the expansion program that has grown out of the merger, Mr. O'Mara and Mr. Stephenson explained.

These are to be located in Atlanta,

to provide for the rapid growth of this section; Chicago or Milwaukee. for taking care of the northwest, and central west, and Los Angeles or San rancisco, for the Pacific coast re-

Early Construction Seen. According to Mr. O'Mara, the Atlanta plant as well as the other two prospective plants is to be erected and put into operation before the end of this year if the present policies are not altered. A resident mancager and an executive officer would ager and an executive officer would be in charge of the local plant, which is to be designated as a sub-assembly plant of the Indiana Truck corpora-tion, of Marion. The principle upon which both of the companies comosing the merger operate is different most concerns. The companies by other firms according to the ecification of the truck company's gineers. For this reason the proposed Atlanta sub-assembly plant would be as complete a unit in its operations as the main plant.

Mr. Stephenson was formerly pres dent of the Indiana Truck corporation, and in addition to a company in the combine, becomes chairman of the executive committee of the Brockway Motor Truck corporation. Mr. O'Mara was formerly fice chairman of the White Motor Truck company, in charge of eastern nerchandising for New York. Unfor the region has been precident to the company of the com der the merger he is president of both concerns. Dempsey Seybold is the branch manager in charge of eorgia sales for the present distriof the Indiana company.

"There are 22,000,000 automobiles in the United States, with scarcely MATERNITY HOSPITAL Private, confidential; children boarded, Mrs. M. T. 3,000,000 in all the other parts of Mitchell, 338 Windsor street, Atlanta the world," Mr. Jordan stated in explaining the progress of the industry, which he believes is just in its infancy and is destined to revolu-tionize the earth, socially, politically,

morally and economically.

"Progress of civilization from the beginning has been coincident with progress in reduction of the cost per ton mile in transportation, with culture and education following economic wealth.

"The farmer who carried his excess
products on his back to the market,
excelled his neighbors in wealth only when he invented the wheel to redu the cost per mile ton of transporta-

"The domineering positions held by "The domineering positions held by the Phoenicians in ancient times and by Britain in modern times was obviously connected directly with efficient transportation on the seas. Likewise the great fortunes of the world's richest men have their origins in the field of transportation. Vanderbilt started with a ferry and ended with the New York Central railway; Carnegie built rails to reduce the cost of transportation: Rockefeller's cost of transportation; Rockefeller's great fortune was built on gasoline.
"People ask me the solution of the People ask me the solution of the European problem. It has nothing to do with men sitting around a table talking about debts. It lies in the introduction of 2,000,000 telephones introduction of 2,000,000 telephones and 2,000,000 automobiles. Transportation and communication will break the barriers of language, politics, religion and trade rivalry. The railroads and the automobiles in the United States have made a real united states instead of 48 separate states. states.
